WILSON fundations™

Level 3 Fluency Readers

Connecting Skills to Confident Reading

Fluency Readers bridge word recognition and language comprehension, **parlaying the automaticity built through Fundations® into the confident, fluent reading** that drives strong comprehension. While Fundations Readers build automaticity with targeted phonic practice, Fluency Readers help students apply those skills in grade-level connected text.

Through sustained reading of engaging fiction and nonfiction chapter books organized into knowledge-building text sets, **students build fluency through repeated practice while developing vocabulary and background knowledge.** The books also include embedded supports for educators.

The Bridge From Decoding to Comprehension

Aligned to the Fundations® Level 3 Scope and Sequence, each text extends classroom instruction with ready-to-use resources that turn automatic word recognition into fluent reading, freeing students' attention for comprehension.

- **Build reading fluency** by giving students repeated practice to apply Fundations skills to increasingly complex text, building the confidence and stamina that comprehension depends on.
- **Grow knowledge and student engagement** with 30 chapter book titles organized around knowledge-building topics aligned to five content strands focused on science and more.
- **Strengthen comprehension** by giving students sustained, connected reading that builds vocabulary and background knowledge, preparing them to read confidently across the curriculum.
- **Save instructional planning time** with embedded comprehension activities, writing and dialogue prompts, and vocabulary support aligned to Fundations instruction.
